

Hüseyin Oğuz Çetin

Computer Engineering Student | ASP.NET Core & Software Development

İzmir, Türkiye · oguzcetin674@gmail.com · github.com/Houzcetin · linkedin.com/in/hoguzcetin

Summary

Computer Engineering student at Yaşar University with hands-on experience in ASP.NET Core applications, REST APIs, databases, mobile development, and email automation. Seeking an ASP.NET Core backend internship or junior software development role, with interests in computer vision and robotics.

Education

B.Sc. in Computer Engineering — Yaşar University, İzmir, Türkiye

Sep 2022 – Jun 2027 (expected)

Relevant coursework: Data Structures, Algorithms, Operating Systems, Computer Networks, Embedded Systems.

Experience

ASP.NET Core Developer Intern — Sentez Yazılım

Jun 2026 – Jul 2026

- Contributed to web application and database development using ASP.NET MVC, REST APIs, MSSQL, and Entity Framework.
- Developed an email classification and AI-assisted response system using MailKit and the OpenAI API.
- Improved the project based on feedback and presented its process and outcomes in an online meeting.

Projects

AI-Powered Email Analysis and Automation System

Internship project

- Built a system to read, analyze, categorize, and store corporate emails in MSSQL, including ERP, CRM, HR, Finance, E-Transformation, Reporting, and General Support categories.
- Developed a feature that generates an AI-assisted response draft for a selected email.

Technologies: C#, ASP.NET Core, MSSQL, Entity Framework Core, MailKit, OpenAI API

github.com/Houzcetin/MailAutomation

Restaurant Management and Reservation System

Personal project

- Built separate Web API and MVC user-interface projects with CRUD functionality for menus, products, reservations, messages, and events.
- Used DTOs, dependency injection, mapping, and validation; added a chatbot, recipe assistance, and AI-powered menu recommendations.

Technologies: ASP.NET Core 6, Web API, MVC, EF Core, MSSQL, SignalR, AutoMapper, FluentValidation, AI APIs

github.com/Houzcetin/APIProject6

CalTrackr — Team Mobile Application

Team project

- The project team built calorie tracking, weekly planning, recipes, favorites, and user account operations.
- Contributed to analysis, planning, development, testing, presentation, and team coordination.

Technologies: React Native, Expo, TypeScript, Node.js, Express, Firebase/Firestore

Team repository: github.com/denizsafak/caltrackr

Technical Skills

Languages: C#, C, C++, Python, JavaScript/TypeScript, SQL, Assembly

Web / Backend: ASP.NET Core, MVC, REST APIs, Entity Framework Core, SignalR, Node.js, Express, HTML, CSS, Bootstrap

Mobile: React Native, Expo

Databases: MSSQL, Firebase/Firestore

Tools: Git, GitHub, Visual Studio, SSMS, Postman

Integrations: MailKit, OpenAI API

Activities & Certifications

Vice President, Yaşar University Mountaineering Club: Contributed to event organization, task allocation, and team coordination.

- Robotics Coding — Turkish Aeronautical Association University
- Web Design — Kadir Has University
